

Equipment/Fleet Control

Does it ever feel that the utilization and maintenance of your internal equipment/fleet is out of control? Knowledge of equipment and repair got you in business. Knowledge of internally used equipment and fleet cost control keeps you in business. Vertical Market Software's Equipment/Fleet Control application offers tools for billing, maintenance, utilization and objective cost reporting of your equipment operations. This refined knowledge of your costs can be instrumental in your continued success in today's increasingly competitive situations.

Some of the benefits of the Equipment/Fleet Control module are:

- * Unlimited number of pieces of equipment.
- * Unlimited number of components per piece of equipment.
- * Ability to categorize equipment into major groupings.
- * Ten cost types available for tracking equipment costs.
- * Multiple billing rates by each piece of equipment, plus "step rate" by hour, day, week or month.
- * Ten areas on each piece of equipment for user-defined information, such as lien holder, insurance carrier, etc.
- * Revenue and cost summary and detail by each piece of equipment - month-to-date, year-to-date, and life-to-date.
- * Retains maintenance history and schedule of maintenance on equipment and components by units (hours or miles) and date.
- * Ability to create invoices for equipment charges (rentals) to external groups, organizations or companies.
- * Interfaces to Accounts Receivable, Job Cost, Inventory, Payroll, General Ledger, Accounts Payable, and Service Management.
- * Numerous management reports including:
 - Equipment/Component lists
 - Maintenance scheduling by units, dates, or both
 - Profit and Loss report on each piece of equipment
 - Operating cost report by each piece of equipment
 - Equipment location report
 - Equipment utilization report
 - Equipment history report for repair history, job cost billings, customer billings and cost transactions
 - Fuel/oil usage report
- * Small tool tracking capability.
